Key findings

Table 1: Contract price adjustment provisions (CPAP) work group indices

Noteworthy month-on-month changes in August 2024 were as follows:

Work group 104 – earthworks: the index increased by 2,9%. There was a change of 6,0% in the index for plant and equipment (accounting for 50,0% of this group).

Work group 106 – piling: the index increased by 2,1%. There were changes of 6,0% in the index for plant and equipment (accounting for 42,0% of this group), 0,7% in the PPI index for cement (accounting for 10,0% of this group), 2,0% in the PPI index for aggregate stone (accounting for 6,0% of this group) and 0,6% in the PPI index for sand (accounting for 3,0% of this group).

Work group 114 – reinforcement: the index decreased by 3,5%. There was a change of -4,6% in the PPI index for reinforcing metal work (accounting for 75,0% of this group).

Work group 125 – metal roofing (aluminium): the index decreased by 3,5%. There was a change of -3,9% in the SEIFSA index for aluminium products 99.7 EC grade rod (accounting for 90,0% of this group).

Work group 172 – refrigeration installations: the index decreased by 3,9%. There were changes of -9,0% in the SEIFSA index for metal price - copper - metric ton (Table F) (accounting for 40,0% of this group) and -1,4% in the SEIFSA index for equal angles (accounting for 5,0% of this group).

Tables 2 and 3: Construction input price index (CIPI)

The annual change in the index for total construction was 4,9% in August 2024. The index decreased by 0,8% month-on-month.

The following indices recorded noteworthy month-on-month changes:

- construction electric motors, generators or transformers (3,0%);
- construction tyres (2,5%);
- construction stone and sand (1,7%);
- electrical cable (-1,1%);
- ready-mix concrete (-1,4%);
- construction structural and reinforcing steel (-2,4%); and
- nails, screws and metal fasteners (-6,5%).

Table 4: Mining and construction plant and equipment price indices

The annual change in the index for plant and equipment was 7,9% in August 2024. The index increased by 6,0% month-on-month.

Table 5: Mechanical and electrical engineering input price indices

The annual change in the index for mechanical engineering was 4,8% in August 2024. The index remained unchanged month-on-month.

The annual change in the index for electrical engineering was 10,0% in August 2024. The index remained unchanged month-on-month.

Table 6: Civil engineering material price indices

The annual change in the total index (civil engineering material) was 5,5% in August 2024. The index increased by 0,1% month-on-month.

Glossary

| | |
|--|---|
| Construction Input Price Indices (CIPI) | The index reflects material purchases in the construction industry. |
| Contract Price Adjustment Provisions (CPAP) | The CPAP work group indices are used for making adjustments based on cost fluctuations in labour, plant and materials. |
| Contract Price Adjustment Provisions Steering Committee | The committee is the oversight structure for the Construction Price Adjustment Provisions published by Statistics South Africa (Stats SA) and includes representatives from the following industry associations and organisations: The Association of South African Quantity Surveyors (ASAQS), Electrical Contractors' Association (SA), Master Builders South Africa, South African Institute of Architects, Department of Public Works and Stats SA. |
| CPAP manuals | The updated CPAP manuals "CPAP Application Manual" and "CPAP Work Groups Composition and Weighting of Sub-Indices" are obtainable from ASAQS' website: www.asaqs.co.za – search for CPAP, or by phoning (012) 406 3304. |
| Respondent response rate | The respondent response rate for August 2024 was 98,7%. The rate was calculated using the total number of companies where prices were collected as a percentage of the total sample. |
| Sources for CPAP | The CPAP work group indices are derived from changes in the cost structures prevailing in 38 different work activities of the building industry and are published by Stats SA on a monthly basis. The indices reported on in this publication are mainly based on a combination of PPI, SEIFSA and CPI indices for the particular month. |
| Tax | Value-added tax (VAT) is not included in these indices. |
| Weights | Weights are updated according to the availability of new information, as follows: <ul style="list-style-type: none"> • Tables 1 and 6 are updated periodically in consultation with industry expert committees. • Tables 2, 3 and 5 are partially updated annually using Stats SA's supply and use tables, with effect from the January statistical release each year. • Table 4 is updated periodically using Stats SA's large sample survey for the manufacturing industry and SARS trade data. • Tables 2, 3, 4 and 5 are updated on a detailed level, using Stats SA's large sample surveys for the construction and manufacturing industries, approximately every three to four years. |
| Revised figures | The SEIFSA data is continuously updated and therefore Stats SA allows for revisions of the CPAP work group indices. Revisions will be promptly indicated in relevant tables to maintain transparency and accuracy. |

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
