Key findings

Headline consumer price index (CPI) for all urban areas

Annual consumer price inflation was 3,2% in February 2025, unchanged from January 2025. The CPI increased by 0,9% month-on-month in February 2025.

The main contributors to the 3,2% annual inflation rate were:

- housing and utilities (4,4% and contributing 1,0 percentage point);
- food and non-alcoholic beverages (2,8% and contributing 0,5 of a percentage point); and
- restaurants and accommodation services (4,6% and contributing 0,3 of a percentage point) – see Table C and Table E.

In February 2025, the annual inflation rate for:

- goods was 2,5%, up from 2,4% in January 2025; and
- services was 3,8%, down from 4,0% in January 2025 – see Table A.

Note: Not all items in the CPI are surveyed every month. Table F shows the survey schedule for items that are not surveyed monthly. Additional surveys are conducted for these items when Statistics South Africa (Stats SA) is aware of significant price changes outside regular survey months.
